Design of Intelligent Controller for Grid Connected Solar Wind System

By Sahebrao Patil

LAP Lambert Academic Publishing Mai 2016, 2016. Taschenbuch. Book Condition: Neu. 220x150x9 mm. Neuware - With increasing concern of global warming and due to the shortfall of fossil fuels in the future, the development of alternative source of energy is needed. The rapid growth in consumption of electric power has always been a concern for every country. This has lead to the increase concern and emphasis on the research and development of alternative sources of energy and solution that intent to contribute both for the efficient production of electric energy from renewable non-pollutant sources (wind and solar). The development of intelligent controller to supply the energy demand while maximizing usage of renewable sources, minimizing connection to the grid, effective use of the available battery storage and supervisory control overall system. It consists of design, simulation and controls of solar controller, wind controller, charge controller, H-bridge voltage source inverter. This design can be achieved by modelling, simulation and actual hardware implementation of solar wind hybrid power system. This multifunctional intelligent controller gives maximum stable output, maximum efficiency of the system, high reliability, protection and load control. 148 pp. Englisch.

Reviews

This sort of ebook is every thing and made me hunting forward and a lot more. I have read through and i also am confident that i am going to going to go through once again once more in the foreseeable future. I discovered this publication from my dad and i encouraged this book to discover.

-- Prof. Kip Spinka IV

A very wonderful book with lucid and perfect answers. It is probably the most incredible book i have study. Its been designed in an exceptionally simple way and is particularly just after i finished reading through this publication by which in fact transformed me, alter the way in my opinion.

-- Macey Schneider
